Summary

Certified Ethical Hacker (**CEH Master**) with hands-on experience in **Vulnerability Assessment & Penetration Testing (VAPT)** across **Web Applications, APIs, and Networks**. Skilled in **identifying, exploiting, and validating vulnerabilities** using real-world attacker techniques. Proven ability to **analyze security flaws, assess impact, and document actionable remediation**, achieving **30–40% risk reduction**. Strong focus on continuous learning and adapting to evolving threat landscapes.

Technical Skills

- **Security Tools:** Burp Suite, Nmap, Metasploit, Wireshark, OWASP ZAP
- **Penetration Testing:** Web, API (Basic), Network, Reconnaissance, Exploitation, Fuzzing (Basic)
- **Web Security:** OWASP Top 10 (Injection, XSS, Broken Auth, IDOR, Security Misconfigurations)
- **Standards:** OWASP, Basic understanding of **NIST, MITRE ATT&CK**
- **Security Operations:** SIEM, Log Analysis, Threat Detection, Incident Response
- **Programming:** Python, Bash
- **OS:** Kali Linux, Windows, Linux

Experience

Cyber Security Lead

Aug 2024 – Present

Dronacharya College Of Engineering, Gurugram

- Conducted **hands-on penetration testing workshops** for 100+ students, improving practical security awareness by 40%.
- Performed **real-world attack simulations** covering reconnaissance, exploitation, and vulnerability validation.
- Guided peers in identifying **OWASP Top 10 vulnerabilities** and applying effective remediation strategies.

Projects

Triage-O-Matic – Blockchain Cyber Triage Tool

- Built a cyber triage system integrating **AI/ML concepts**, improving analysis efficiency by 20%.
- Implemented **secure evidence handling using blockchain**, ensuring integrity and chain of custody.
- Focused on **structured vulnerability analysis, documentation, and reporting workflows**.

Education

B.Tech in Computer Science (Cybersecurity)

2023 – 2027

Dronacharya College Of Engineering, Gurugram

Certifications

- **Certified Ethical Hacker (CEH - Master)** ECC2917385046
- **Certified Ethical Hacker (CEH - Practical)** ECC6718920453

Role Alignment

- Hands-on experience in **VAPT across Web Applications, APIs, and Networks**.
- Strong ability to **identify, exploit, and validate vulnerabilities**.
- Experience in **documenting findings with clear remediation recommendations**.
- Familiar with **manual and tool-based penetration testing methodologies**.
- Highly motivated to contribute as a **Penetration Tester** in real-world engagements.
